

ARCHETYPES AND ROLES

Archetypes are roles we can take on over the course of a lifetime. Each role has a light side and a shadow side. Each of us have four main archetypes (noted with an *), but you have the power to decide which additional archetypes you are and whether the light or shadow side is leading. You can change them as often as you would like. These roles are important for self-exploration and self-empowerment. Review the list, and select who you would like to be.
